## Wine Guardian Through-the-Wall Cooling Systems

Through-the-Wall cooling systems are available in two sizes, for cellars up to 1500 cubic feet, each with a sleek, modern design to match the unique style of today's wine cellar. Perfect for small to mid-sized cellars, this innovative system offers exceptional air flow and maintains optimal temperature and humidity – all with the quietest operation in its class.

### Standard Features:

- Wine Guardian TTW series can directly replace most through-wall models
- Controls temperature
- Displays both temperature and humidity
- Specialized fans create ideal airflow
- Adjustable louvers optimize cellar air circulation
- Extremely quiet operation
- EasyMount™ one-piece wall bracket and support frame

- Commercial-grade, corrosion-resistant components and all-aluminum frame for long-term durability
- Integrated condensate evaporation system
- Drain overflow connection
- Can be mounted flush with the wall or racking
- Power cord connections on both sides of system
- Environmentally friendly R-134a refrigerant
- Certified to Underwriters Laboratory standards
- Made in the USA

### Options:

- Remote Monitoring
- Hot Air Discharge
- Duct Adapter
