For wine enthusiasts looking for the best way to cellar wine in their own home to keep it at its finest whether for months or even years a new solution has emerged from Wine Guardian. If those fine wines brought home in your [Meritage Moka wine carrier](#) are not kept properly light and temperature can wreak havoc on the flavor and make that purchase less than desirable after even a short time of being cellared if done improperly.

Wine Guardian has an affordable solution that is ideal for not only small restaurants but even the home cellar. Not only is their through the wall system for storing wine effective in keeping wine at the optimal levels of temperature and humidity; but this wine storing solution is one of the most environmentally sound as well.

Many homeowners looking for a way to store wine in their home and worry that one of their only options are wine refrigerators. But with the through the wall system wine lovers can have complete control of their cellar all with a unit that is economical to buy and operate.
