

Humidification

Drip pan type humidifier with integral evaporator fan, water valves and controls

- Easy access humidifier pad for ease of maintenance
- Powered by 24V from Wine Guardian unit. No separate power connections required.
- Cellar Mounted digital humidistat for precise humidity control.

Duct Collars

Supply and return duct collars.

- Molded plastic design provide light weight rigid piece for connection to ductwork.
- Available for supply and return openings with flexibility for any inlet/outlet location.
- Designed to be used with Wine Guardian grills for connections at the Wine Cellar

Electric Heat

Integral Electric Heater coil and controls.

-Heater turns on to protect collar from low temperature conditions.

-Ideal for areas where ambient temperatures fall below 50 Deg. F

Low Ambient

Integral compressor crankcase heater to protect against low temperatures

-Integral low ambient refrigerant control valves to control condenser operation

-Required when Wine Guardian is mounted in an area where temperatures fall below 40 Deg. F.
